This project was funded in part
by the California Arts Council, a
state agency, through the
Upstate California Creative
Corps Program.

In the face of climate change,
fires, extreme weather and public
health crises, the need for
Californians to pull together as a
community is great, especially in
our most vulnerable regions.
Hosking envisions Climate
Country Radio as a possible tool
to help create resilient
communities with the joy and
relief of music.
